

www.GrowersMineral.com

From our humble beginning in 1955 to the present day, Growers Minerals Solutions has stood the test of time. Our proprietary formula was developed by Dr. V. A. Tiedjens, a well respected soil scientist. His research over many years is used on any crop that's grown in North America. We are very interested in the farms' soil health as well. If a farms soil has been abused for some time, no amount of nutrients will give a profitable return.

For more information see your local representative.
